

Snowflake Go Fish

by Jessica Fredrickson

Fun in PreK-1

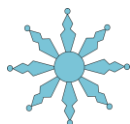

{Description}

This is a snowflake-themed version of the popular card game known as “Go Fish,” designed to be a fun game for your PreK & Kindergarten math centers during winter. This game targets number recognition 1-20 and was designed with visual counting supports.

{Instructions}

Print two copies of cards onto cardstock and laminate for best results. The instructions for the game are the same as traditional Go Fish. 2-4 students may play this game. Distribute 5 cards to each player and leave the rest in the “snowbank” aka pile in the middle. Students take turns asking other players if they have a certain number; the student must have that card in his or her hand to ask for it. When the student obtains two of a kind he or she places them down. The student who runs out of cards first wins; however in my class we play till everyone wins! 😊
